

NáuticaBarata

Summary

This repository contains the sources of NáuticaBarata, the online shop with the best selection of nautical equipment.

Requisites

- Ruby 2.1.2
- Rails 4.1.1
- MySQL 5.5.

Installation

To run NáuticaBarata follow this steps:

1.- Create the development and test databases by running the following commands on your mysql console:

```
mysql> create database eshop06_development;  
mysql> create database eshop06_test;
```

2.- Create the user 'eshop06' and grant him all permits on the databases you just created using the following commands:

```
mysql> grant all on eshop06_development.* to 'eshop06'@'localhost' identified by 'cisco';  
mysql> grant all on eshop06_test.* to 'eshop06'@'localhost' identified by 'cisco';
```

3.- Install the gems listed on the gemfile by running:

```
bundle install
```

4.- Bring your database up-to-date by using:

```
rake db:migrate
```

5.- Set up your server by running `rails server` and paste this adress `http://localhost:3000` on your favorite browser.

Thank you!
